Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The present invention is drawn to a sample-and-hold peak detector circuitry utilizing a comparator circuit, a sample and hold circuit, a compensation circuit and unload circuit recited in claims 1-9. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: "a compensation circuit for compensating residual currents comprising emulating means for emulating residual currents caused by said comparator circuit influencing the functionality of said sample and hold circuit", "an unload circuit comprising a clearing means for decreasing the output signal of said sample and hold circuit" and "wherein said compensation circuit comprises copies of parts of the comparator circuit as emulating means" in combination with "a comparator circuit" and "a sample and hold circuit" as recited in claim 1.

The prior art references submitted by the applicant on IDS form received on 06/24/03 was reviewed and considered. These references (e.g. U.S Patent No. 5,986,481 and US Patent No. 5,995,166) appear to be the best references with respect to the claimed invention (e.g. comparator circuit, sample and hold circuit) and closely matched most of the references found during the examiner's searches. However, the limitations "a sample and hold circuit ... for holding the output signal", "the compensation circuit ... the functionality of said sample and hold circuit", "unload circuit ... for decreasing the output signal of said sample and hold circuit" and "wherein said

compensation circuit as emulating means" are not disclosed. Therefore, the claims are patentably distinct over all these prior art references of record.

The prior art references cited on PTOL-892 are for interest and documentation purposes only. These prior art references also lack at least one of the claimed limitation.

Thus, claims 1-9 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My-Trang N. Ton whose telephone number is 571-272-1754. The examiner can normally be reached on 7:00 a.m - 5:30 p.m.
